5. Group Instructor Workshop

Introduction

Each exercise in a given Tabata workout lasts only four minutes, but it is likely to be one of the longest four minutes you have ever endured. The doctor designed a training where participants gave their maximum effort for 20 seconds, then 10 seconds for rest. They repeated this cycle for four minutes in other words, eight 30-second cycles. That in a nutshell is a Tabata exercise. Forget the gym membership and fancy fitness accessories. Sometimes, all you need is 30 minutes and some space.

Syllabus

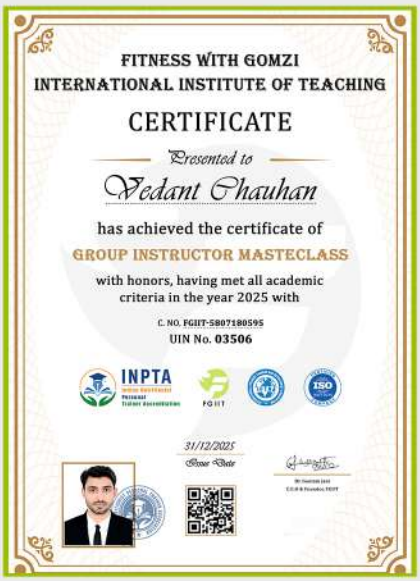

- Fundamentals of Group Training
- Biomechanics & Movement Science
- Functional Training
- Tabata Training
- HIIT Training
- TRX Suspension Training
- Core Training Techniques
- Strength & Endurance Training
- Mobility & Flexibility Training
- Warm-up & Cool-down Protocols
